

## Reference Letter from Hydro

Dear Mr. Kaban,  
Thanks I am fine .

I was hoping to be able to give you my impressions on your machine and service earlier so I apologise for that .

At my time in Kuppam managing the company , we installed and implemented many new machines and processes , and your CNC was one of the big success stories in my book.

I must say that Kaban at that time was not a well known supplier to me. My team though convinced me and we purchased your machine (importing from Turkey to India in 2017/2018) .At installation and start up almost everything went seamlessly even by European standards . But where I was most satisfied was when we asked for your support to improve the machine it was done very quickly and with no additional cost . To my knowledge the machine is still working well and at expected uptime rate. For your support I thank and wish you continued success

Mauro Spizzo  
Former Vice President India and Vietnam

Thanks and Best Regards
